FOREWORD

The "Synopsis of the Collections" is intended to aid visitors to the Museum in finding the collections in which they may be most interested. It may be used as an index to the exhibitions or it may be followed in its entirety when a general view of the collections is desired. The exhibitions have been taken up in an order which follows the continuity of thought underlying the installation in each department and guides the visitor through the halls with the greatest economy of time. As a further aid to visitors, the Museum offers the services of a guide lecturer with whom appointments may be made for groups of ten or more individuals. Such appointments should be made at least a week in advance of the intended visit.
